

Green Shipping Programme invites to a seminar

Pilot Projects for a green future

Agenda

1500	5	Welcome	Harald Solberg
	5	Gjennomgang av agenda av ordstyrer	Sveinung Oftedal
1510	10	Green Shipping Programme – an overview	Narve Mjøs
1520		Pilot project studies	
	5	Financing of 2° C shipping: Reducing the climate risk for key shipping stakeholders	DNB
	5	Transition Finance: How can investors incentivize the shipping industry in the transition from fossil to renewable	KLP
	5	Ammonia as fuel: Feasibility of using ammonia on a passenger ship	Color Line
	5	Liquid organic hydrogen carrier (LOHC): How can LOHC be a solution in a carbon neutral future	Siemens
	5	Autonomous electric ferries: How can a smart system of ferries replace bridges and tunnels?	Massterly
	5	Sustainable cruise traffic: Creating a realistic roadmap for reducing the environmental footprint	RCL
1600	10	Q&A	
1610	30	Break	
1640		Pilot projects under realization – from start to now	
	5	Shuttle tankers going towards net zero: From battery and LNG to carbon capture and storage	Altera
	5	Shift from road to sea: How can autonomous sea-drones enable a zero-emission transportation system	Asko
	5	Next generation short-sea vessels: How can the shipowners hedge their design for the uncertainty	Vard
	5	Zero-emission bulk transportation: Cargo owners in lead	HeidelbergCement
1705	10	Q&A	
1715	20	Roundtable: From local to global scaling	KLP, Grieg, FK
1735	85	Finger food and drinks	
1900		The end
